

## SUPPLEMENTARY FIGURES

**Supplementary Figure 1. Clustering heat map based on the GSE84437 dataset.** The expression level of GDRGs and the proportion of clinicopathologic features in three molecular subtypes. GDRG: gastric cancer differentiation-related gene.

**Supplementary Figure 2. Differentially expressed GDRGs based on the TCGA cohort.** There were 258 differentially expressed genes between normal and GC samples. TCGA: The Cancer Genome Atlas, GDRG: gastric cancer differentiation-related gene.
