

SUPPLEMENTARY FIGURES

Supplementary Figure 1. Inhibition of HDAC6 by TubA prevents TBHP-induced apoptosis in chondrocytes. (A, B) TUNEL staining quantification of positive cells in each group of chondrocytes, scale bar = 100 μ m, scale bar (enlarged) = 20 μ m.

Supplementary Figure 2. TubA treatment decreases HDAC6 expression in OA mice. (A, B) IF staining and quantification of the changes in HDAC6 in each group of mice, scale bar = 50 μ m, scale bar (enlarged) = 10 μ m.
