

SUPPLEMENTARY FIGURE

Supplementary Figure 1. OGD/R-induced PC-12 cell growth inhibition was reversed by miR-532-5p agomir. (A) PC-12 cells were treated with miR-532-5p agomir, OGD/R or OGD/R plus miR-532-5p. Then, the viability of PC-12 cells was tested by CCK-8 assay. (B) The apoptosis of PC-12 cells was tested by flow cytometry. ** $P < 0.01$ compared to Control; ## $P < 0.01$ compared to OGD/R. All experiments were performed in triplicates.
